Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicants claim a process of preparing (nitromethyl)phenyl esters of salicylic acid derivatives. The process comprises reaction of salicylic acid halide with hydroxybenzylalcohol and subsequently nitrating the product obtained using a nitration mixture comprising steaming nitric acid and inorganic acid or organic acid anhydride. The closest prior art of record is to Del Soldato et al, WO 97/16405. Del Soldato et al teach the reaction of bromomethyl phenol with AgNO_3 to obtain 3-hydroxybenzyl nitrate, which is subsequently reacted with acetylsalicylic acid chloride to give the desired product. The present invention differs from the prior art in that cheaper nitrating agents are used. Moreover, the undesired side reactions are avoided. The process described in this application are neither taught or suggested in the prior art; furthermore there is no suggestion or motivation to modify the processes of the prior art in the manner in which the applicant has to arrive at the instant process of preparing (nitromethyl)phenyl esters.

Any comments considered necessary by applicant must be submitted no later than the payment issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons for Allowance."
